

MEET THE NEEDS OF DEMANDING PATIENTS

3 SERIES™
BTE 13

ADD ANOTHER OPTION TO YOUR WIRELESS OFFERING

3 series™

↙ Introducing the perfect fit for patients who need more gain but don't want a bigger hearing aid — the new 3 Series BTE 13.

The smallest 13 BTE we've ever designed, 3 Series BTE 13 offers everything that has made our 3 Series lineup so in demand — including new, ergonomic casing, tactile user controls, and all the benefits of our wireless IRIS™ Technology — all in a fully featured BTE with the power of a high-gain receiver and the longevity of a 13 battery.

**PATIENTS
WANT:**

**3 SERIES BTE 13
DELIVERS:**

Small
hearing aids

The smallest BTE 13 we've
ever designed

A way to hear
better in noise

Two technologies—Voice iQ² and InVision
Directionality—which, together, tackle
the issue of hearing speech in noise

Hands-free
cell phone
conversations

SurfLink[®] Mobile, the only cell phone
solution that uses JustTalk to turn the
patient's wireless hearing aids into
both phone receiver *and* microphone

Wireless media
connectivity —
without any body-
worn relay devices

Dongle-free wireless streaming of
TV, computers, MP3 players and
more, thanks to SurfLink Media
and SurfLink Mobile

An easy and
comfortable
fitting process

The ultimate speed and flexibility
in direct-to-hearing aid wireless
programming via SurfLink Programmer

More natural
3D-like sound

Binaural Spatial Mapping, Starkey's
proprietary ear-to-ear protocol that
optimizes SNR settings based on
inputs to both ears

Improved high
frequency
audibility

Spectral iQ, our patented technology
that intelligently identifies high-
frequency speech cues and replicates
them in lower frequencies

A more
personalized
listening experience

ISO Compression, which allows
for independent control of soft,
moderate and loud level speech

No buzzing or
whistling

The industry benchmark for
feedback elimination—PureWave
Feedback Eliminator— with up to
28dB of added stable gain

Reliable, no-hassle
hearing aids

HydraShield,^{®2} our water and wax-
repellent nano-coating; a new,
ergonomic switch; and a redesigned
mic cover that resists clogging

↳ Launched in 2012, our wireless 3 Series hearing aids are earning rave reviews for their performance, reliability and user-friendliness.

Now, we're adding even more power and performance to the lineup with the introduction of a BTE 13.

Small, wireless and loaded with our leading performance features, 3 Series BTE 13 is the new go-to solution for your most demanding patients.

**Get more — in our
smallest BTE 13 ever**

Fit your patients with a better and more powerful BTE

Key 3 Series BTE 13 features:

- A small and stylish wireless BTE, but with the longevity of a 13 battery
- Features 3 Series' patient-driven design enhancements, including:
 - Tactile switch that provides easy finger or thumb registration
 - Easy-to-operate battery door
 - Automatic DAI functionality and a telecoil
 - New, more wax-repellent microphone cover
- Compatible with our innovative SurfLink accessories, including SurfLink Mobile
- Enables wireless programming, and wireless phone and media streaming
- Packed with our leading performance features, including
 - **Voice iQ²**
 - **HydraShield² nano-coating**
 - **Spectral iQ**
 - **ISO Compression**
 - **Binaural Spatial Mapping**
 - **And more**

It's the newest member of our patient-driven 3 Series lineup.

Also available in Tour™ i30 and i20, our popular economy product line.
