

STARMED VIDEO OTOSCOPE

Today's competitive marketplace requires the ability to serve your patients in more ways than ever before. Offering a wide range of services and increasing understanding can be an important part of your success. How can you expand your capabilities and add a new dimension to your practice? The StarMed Video Otoscopy System.

 STARKEY

STARMED VIDEO OTOSCOPE

- 'Single Touch' Freeze frame button ergonomically integrated into the otoscope handle.
- Starkey's proprietary C.A.F. (continuous air flow) technology prevents the rod lens from fogging due to moisture and humidity in the ear canal.
- The StarMed Generation 5 camera has the highest resolution in the industry.
- Integration of video signal, fiber optic and air flow cables into a single unit makes manipulation of the otoscope easier and more efficient.
